

## CORRELATOR3D VERSION 8.5

### NEW FEATURES:

- Data Sharing: Project results can now be shared online through Cesium. (Current Release - Version 8.5.0)
- Online Data Viewer: Results can now be visualized online from any web browser / device. (Current Release - Version 8.5.0)
- Reflectance Map: Calibrated reflectance maps can now be generated for multispectral projects. (Current Release - Version 8.5.0)
- Reflectance Panels: Calibrated reflectance panels can now be added to multispectral projects. (Current Release - Version 8.5.0)
- Sun Sensors: Reflectance information can now be calculated using the sun sensor (DSL) of Micasense cameras. (Current Release - Version 8.5.0)
- Index Maps: Index maps are now computed using the calibrated reflectance information, if available. (Current Release - Version 8.5.0)
- Mosaic: Mosaics can now be exported with JPEG compression. (Current Release - Version 8.5.0)

### ENHANCEMENTS:

- GPU Detection: The detection of the GPU has been improved. (Current Release - Version 8.5.0)
  - Remote Desktop Connection: Correlator3D™ can now be executed seamlessly through a Remote Desktop Connection. (Current Release - Version 8.5.0)
- 

- Orthorectification: The nadir optimization option is now toggled automatically depending on the project type. (Current Release - Version 8.5.0)

## BUG FIXES:

- Various bug fixes. (Current Release - Version 8.5.0)
